The use of l', n' and t' in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasise the fact that they are used for single letters only in Serbian.

'Shch' and 'sht' invariably represent the letter III, in Russian and Bulgarian, respectively, since the pairs of letters (IIIh in Russian and IIIT in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet 'The transliteration of Russian, Serbian and Bulgarian for bibliographical purposes' published by the Royal Society, Burlington House, London W1 (February 1953, price 5p.). It represents the system at present in use in Science Abstracts for the transliteration of the names of journals and the names of authors of articles abstracted.

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966-68. The table below shows the prices and periods for the two types of cumulative index.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm x 100 mm (6" x 4") cards.

TOPICS

This is an SDI service based on standard profiles. There are over 70 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

INFORMATION JOURNALS

Abstracts Journals

The three INSPEC Abstracts Journals give a comprehensive coverage of their subject fields providing full bibliographic information including a 100-150 word summary of the original and carefully prepared comprehensive indexes.

Physics Abstracts

Electrical and Electronics Abstracts

Computer and Control Abstracts

Current Papers Journals

Give comprehensive coverage of their subject fields and provide full bibliographic information for each entry. Do not contain indexes and do not provide a summary of the original.

Current Papers in Physics

Current Papers in Electrical and Electronics Engineering

Current Papers on Computers and Control

KEY ABSTRACTS

Low cost selective information journals providing a personal information service. Each issue contains approximately 200 references which include full bibliographic information and a summary of the original. Eight subject fields are currently available, -

Electronic Circuits

Systems Theory

Communication Technology

Solid State Devices

Industrial Power and Control Systems

Power Transmission and Distribution

Electrical Measurements & Instrumentation

Physical Measurements & Instrumentation

INSPEC RETRIEVAL SERVICES

Magnetic Tape Services

The full INSPEC database is available in machine-readable magnetic tape in a number of formats.

SDI (Selective Dissemination of Information)

User profiles are held on the INSPEC computer and run weekly against the input to the INSPEC database. This information service provides notification cards giving full details of each reference.

TOPICS

A weekly information service offering a list of fixed profiles which are run weekly against the input to the INSPEC database. Output in the same format as the INSPEC SDI service.

Literature Search Service

The IEE Library offers a search service within INSPEC's subject fields. Information Officers conduct searches of the literature and prepare selective bibliographies according to enquirers needs. Cost varies according to searches.

INSPEC Research Reports and User Aids

A series of reports describes research which INSPEC has carried out in the field of information science. Other User Aids and bibliographies are available. Details may be obtained from INSPEC Marketing Department.
